## Profile

---

I am a Computer Systems Engineer and Backend Developer with over four years of experience building scalable, secure, and high-performance systems. I design reliable **APIs** and system architectures that ensure efficient communication, seamless data flow, and long-term scalability.

My expertise spans RESTful API development, database optimization (**PostgreSQL, MySQL**), cloud infrastructure (**AWS**), and containerization with Docker. I also have strong hands-on experience in networking, server administration (**Linux and Windows**), and **IT support**, enabling me to design, deploy, and maintain complete, production-ready systems end-to-end.

## Work Experience

---

2026/08 – Present  
Lusaka

### IT OFFICER

*Phoenix of Zambia Assurance* ☑

IT Officer responsible for maintaining secure, reliable, and efficient ICT operations across Phoenix. Provide technical support to staff; administer computer hardware, software, servers, networks, internet connectivity, email, and user access. Support insurance and other business applications, strengthen cybersecurity and backup readiness, manage ICT assets and vendors, and contribute to system upgrades, automation, and digital transformation initiatives.

- Maintain and troubleshoot ICT hardware, software, communication systems, configuring networks, firewalls, and servers while providing technical support and training to staff.
- Manage user accounts, email, passwords, permissions, and role-based access to protect company information.
- Implement and monitor cybersecurity controls, backups, data restoration, disaster recovery, and business-continuity processes.
- Support insurance and other business systems, coordinate with vendors, and maintain accurate ICT asset, licence, configuration, incident, and reporting records.

2025/11 – 2026/07  
Lusaka, Zambia

### Software Developer

*Computers for African Solutions LTD*

Developed and maintained multi-tenant ERP systems using Node.js and PostgreSQL, building secure REST APIs, implementing RBAC, managing database migrations, and deploying scalable applications on AWS. Integrated email and DNS systems to support reliable communication services.

Additionally, designed and managed LAN/WAN network infrastructure, configuring switches, routers, VLANs, and VPNs to ensure secure, high-performance, and highly available network environments.

2023/09 – 2025/03  
Lusaka, Zambia

### Junior Software Developer/Tester

*John Snow Health Zambia(JSH)* ☑

- Managed the full software development lifecycle for eLMIS, from requirements gathering and system design through development, testing, deployment, and ongoing maintenance. Developed and enhanced scalable, maintainable solutions while integrating eLMIS with internal and external systems to support accurate, seamless data exchange. Created technical documentation, user guides, job aids, and training materials to improve adoption and usability. Applied Agile development practices and designed comprehensive test plans and test cases for the eSCMIS suite—including Facility, Central, Hub, and District modules—to ensure system reliability, accuracy, performance, and integration quality.

2022/05 – 2022/12  
Lusaka, Zambia

### Junior Software Developer

*Twende Limited (Adanian Labs)*

- Conducted **end-to-end testing** of the Letstwende platform, covering:
- Customer ordering workflows
- Vendor order management flows
- Courier dispatch and delivery tracking
- Identified and documented **bugs, edge cases, and performance issues**
- Performed **API testing** to ensure correct data flow between frontend, backend, and third-party services

2021/01 – 2021/04  
Lusaka, Zambia

### Software Developer Intern

*CERIC TECHNOLOGIES - Reuben Chisebu*

Contributed to the development of a loan management system built with Laravel and MySQL, supporting key aspects of the backend development lifecycle. Collaborated with the Team Lead to design and implement features enabling users to apply for, track, and manage loans efficiently.

## Skills

---

### LAN/WAN / VLAN

Cisco Networking, CCNA1 & CCNA2, IT Support

### Windows Server

Active Directory, DNS, DHCP

### Frontend

HTML, CSS, ReactJS, VueJS

### Ochastration Tools

Docker containers, Kubernetes

### Databases

MySQL, PostgreSQL

### Odoo

Odoo is an **all-in-one business management software** (ERP – Enterprise Resource Planning) that helps organizations manage a wide range of business functions in a single platform.

### Mobile Development

React Native/ Flutter

### Framework

Spring boot, Spring MVC.

### Linux

Ubuntu, CentOS, RedHat

### Backend

JAVA, PHP, GOLANG, PYTHON, NODEJS

### Agile Methodology

Experienced in Agile development environments with regular sprint planning, standups, and retrospectives.

### Wordpress

customized themes, built child themes from scratch, managed plugins, and handled everything from site performance optimization to basic SEO.

### AWS

- **Compute:** Launched and managed EC2 instances for hosting REST APIs and containerized applications using Docker.
- **Storage:** Utilized S3 for storing application assets, backups, and configuration files.
- **IAM:** Created and managed IAM users, roles, and policies for secure access control.

## Certificates

---

### CISCO Certification

CCNA Routing and Switching: Introduction to Networks

### Bachelor of Computer Science

Computer Systems Engineering

### U.S. Family Planning and Abortion Requirements

### CISCO Certification

IT Essentials

### JSI/WEI Child Safeguarding Course
